[I] Introduction + Inspiration + Idea Derivation :

Zermelo–Fraenkel Set Theory → Process IoT Informatics Using Isabelle HOL Software/JikesRVM-Research Virtual Machine/KVM/Scala/Smart Devices/IoT/HPC R&D Heterogeneous Systems.

“ Kubernetes is a portable, extensible, open-source platform for managing containerized workloads and services, that facilitates both declarative configuration and automation. It has a large, rapidly growing ecosystem. Kubernetes services, support, and tools are widely available.”

[Source → https://kubernetes.io/docs/concepts/overview/_print/]

“Isabelle is a generic proof assistant. It allows mathematical formulas to be expressed in a formal language and provides tools for proving those formulas in a logical calculus. The main application is the formalization of mathematical proofs and in particular formal verification, which includes proving the correctness of computer hardware or software and proving properties of computer languages and protocols. The most widespread instance of Isabelle nowadays is Isabelle/HOL, which provides a higher-order logic theorem proving environment that is ready to use for big applications. Isabelle/HOL includes powerful specification tools, e.g. for (co)datatypes, (co)inductive definitions and recursive functions with complex pattern matching. Proofs are conducted in the structured proof language Isar, allowing for proof text naturally understandable for both humans and computers”.

[II] HOL Informatics Framework Using Specified Tools w.r.t LLVM + RVM :

ZF THEORY BASED ADVANCED TESTING OF KUBERNETES + IoT INFORMATICS FRAMEWORKS
JVM LANGIAGES PLAY A VITAL ROLE IN IMPLEMENTING NEXT GENERATION INFORMATICS
HENCE THIS SMALL ATTEMPT FROM OUR SIDE.
ONE OF THE PIONEERING RESEARCH EFFORTS IN THIS DIRECTION.
PLEASE CHECK OUR NOTES ON VIXRA.ORG + github FOR SIMILAR IDEAS & ALGORITHMS
Thanks - Dr.Nirmal.

Testing Kubernetes & ZF Theory w.r.t HOL - Isabelle + JikesRVM + LLVM + Hardware + Software
for Advanced IoT/HPC Related Informatics Framework.
Testing in Progress.
Approximate Idea/Actual Implementation might vary/Please Check.
Thanks - Dr.Nirmal.

[ALGORITHM I - ZF THEORY w.r.t -> Testing Kubernetes & IoT Informatics Frameworks]

[Figure I – Algorithm I – Simple Informatics Testing Framework]

** Formalising Ruby in Isabelle ZF by Ole Rasmussen August 1995 → Highly Useful.

[III] Acknowledgments: Sincere Thanks to all WHO made this happen in my LIFE.
Non-Profit R&D. Inspire Others Always.

[THE END]
